

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 - 5 (canceled)

Claim 6 (canceled)

Claims 7 - 20 (canceled)

21. (new) An information electric appliance renting system in which a service providing company leases to a plurality of individual use contractors at least one information electric appliance based upon contracts between the service providing company and the plurality of individual use contractors,

wherein the at least one information electric appliance enables sending of data indicative of at least electric power consumed thereby to a rent managing server of the service providing company through a communication line and also enables receipt from the rent managing server of data relating to rent for the at least one information electric appliance which includes an amount corresponding to the electric power consumed thereby so that the service providing company receives from the plurality of individual use contractors payment of the rent and pays an electric power company an amount corresponding to the total consumed electric power of the leased information electric appliances of the combined individual use contractors.

22. (new) An information electric appliance renting system according to claim 21, wherein the service providing company contracts with the electric power company to pay for electric power consumed by the leased information electric appliances of the individual use contractors based upon rates for the total consumed electric power of the leased information electric appliances of the combined individual use contractors.

23. (new) An information electric appliance renting system according to claim 21, wherein the data sent by the at least one information electric appliance to the rent managing server further includes information relating to at least one of manufacture and use of the at least one information electric appliance.

24. (new) An information electric appliance renting system in which a service providing company leases to a plurality of individual use contractors a plurality of information electric appliances based upon contracts between the service providing company and the plurality of individual use contractors,

wherein at least one of the plurality of information electric appliances leased by respective individual use contractors enables sending of data indicative of at least electric power consumed by the plurality of information electric appliances of the respective individual use contractors to a rent managing server of the service providing company through a communication line and also enables receipt from the rent managing server of data relating to rent for the plurality of information electric appliances which includes an amount corresponding to the electric power consumed thereby so that the service providing company receives from the plurality of individual use contractors payment of the rent and pays an electric power company

an amount corresponding to the total consumed electric power of the plurality leased information electric appliances of the combined individual use contractors.

25. (new) An information electric appliance renting system according to claim 24, wherein the service providing company contracts with the electric power company to pay for electric power consumed by the leased information electric appliances of the individual use contractors based upon rates for the total consumed electric power of the leased information electric appliances of the combined individual use contractors.

26. (new) An information electric appliance renting system according to claim 24, wherein the data sent by the at least one information electric appliance to the rent managing server further includes information relating to at least one of manufacture and use of the at least one information electric appliance.

27. (new) An information electric appliance renting system according to claim 26, wherein the at least one information electric appliance of respective individual use contractors include at least one first information electric appliance which is connected to the Internet, and a second information electric appliance which is connected to said first information electric appliance through a communication line.

28. (new) An information electric appliance renting system according to claim 26, wherein the rent managing server arithmetically determines the consumed electric power rate of the leased information electric appliances for the electric power company which supplies electric power to the leased information electric appliances,

and enables supplying the electric power company with data relating to the consumed electric power rate through a communication network.

29. (new) An information electric appliance renting system according to claim 26, wherein the at least one information electric appliance of respective individual use contractors include a first information electric appliance which is connected to the rent managing server of said service providing company through a communication network and a second information electric appliance which is connected to the first information electric appliance through a communication line.

30. (new) An information electric appliance renting system according to claim 29, wherein the first information electric appliance enables display thereon of the data relating to the other information the consumed electric power rates of the first and second information electric appliances.

31. (new) An information electric appliance renting system according to claim 29, wherein the first information electric appliance enables maintenance diagnosis or replacement diagnosis of the second information electric appliance which is connected to the first information electric appliance through the communication line.

32. (new) An information electric appliance renting system for leasing information electric appliances to a plurality of individual use contractors, comprising:

at least one information electric appliance which is leased by a service providing company to respective ones of a plurality of individual use contractors; and

a rent managing server of the service providing company for managing the leased information electric appliances of the service providing company;

wherein the at least one information electric appliance has communication means for sending including electric power consumed thereby to the data rent managing server, and the rent managing server has communication means for receiving the data sent from the at least one information electric appliance of the individual use contractors so that the service providing company receives from the plurality of individual use contractors payment of the rent and pays an electric power company an amount corresponding to the total consumed electric power of the leased information electric appliances of the combined individual use contractors.

33. (new) An information electric appliance renting system according to claim 32, wherein the data sent by the at least one information electric appliance to the rent managing server further includes information relating to at least one of manufacture and use of the at least one information electric appliance.

34. (new) An information electric appliance renting system according to claim 32, wherein the service providing company contracts with the electric power company to pay for electric power consumed by the leased information electric appliances of the individual use contractors based upon rates for the total consumed electric power of the leased information electric appliances of the combined individual use contractors.

35. (new) An information electric appliance renting system according to claim 33, wherein the rent managing server includes means for calculating a charge which is to be charged for a use contractor leasing the at least one information electric

appliance in accordance with the data thereof and for calculating the electric power rate which is to be paid to the electric power company in accordance with the data.

36. (new) An information electric appliance renting system according to claim 33, wherein the rent managing server records and manages the data.

37. (new) An information electric appliance renting system according to claim 33, further comprising an information terminal through which information of the rent is provided, and the at least one information electric appliance, the information terminal and the rent managing server have communication means for communicating the information terminal, communication means for communicating with the at least one information electric appliance and the rent managing server, and communication means for communicating with the information terminal, respectively, and said information terminal has means for recording the data, means for operating arithmetically the amount of consumed electric power from the data, and means for sending the data relating to the amount of consumed electric power thus arithmetically operated to the rent managing server.

38. (new) An information electric appliance renting system according to claim 35, wherein the at least one information electric appliance has operation controlling means for controlling the operation thereof, and the rent managing server has means for obtaining the amount of consumed electric power of the at least one information electric appliance on the basis of control data provided by the operation controlling means and for obtaining a use rate inclusive of an electric power rate which is to be

charged for a use contractor and the electric power rate which is to be paid to the electric power company.

39. (new) An information electric appliance renting system according to claim 33, further comprising electric power measuring means for measuring the electric power of the at least one information electric appliance, wherein the rent managing server has means for operating arithmetically a use charge inclusive of an electric power rate which is to be charged for a use contractor and the electric power rate which is to be paid to the electric power company on the basis of an amount of electric power measured by the electric power measuring means.

40. (new) An information electric appliance renting system according to claim 33, wherein said rent managing server enables sending of data relating to a situation of half-way progress of use of the electric power to the at least one information electric appliance.

41. (new) An information electric appliance renting system according to claim 34, wherein the rent managing server enables arithmetic operation in such a way that when the operation result data of the at least one information electric appliance is equal to or smaller than a predetermined amount, the consumed electric power rate is decided as a fixed amount, while when the operation result data of the at least one information electric appliance exceeds the predetermined amount, the consumed electric power rate is increased in accordance with the data thereof.

42. (new) An information electric appliance renting system according to claim 33, wherein the rent managing server includes judgement means for judging the data sent from the at least one information electric appliance, carrying out a judgement of abnormality of the at least one information electric appliance and for judging on a basis of a judgement result whether or not maintenance needs to be carried out.

43. (new) An information electric appliance renting system according to claim 33, wherein the rent managing server includes means for generating a running pattern on a basis of the data sent from the at least one information electric appliance to compare a total cost up to a scrapping processing of the at least one information electric appliance with a total cost up to a scrapping processing of an information electric appliance which is replaceable with the at least one information electric appliance to execute the replacement judgement for the at least one information electric appliance.
